

Business Application Development

Noratek has developed custom business applications for a broad range of industries – each designed and built to meet our clients' unique specifications. Our in-depth development process identifies potential issues early on, enabling our developers to address them before they become critical. This saves our customers valuable time and money.

Web Design and Development

Using the latest technologies, we provide our clients with websites and designs customized to fit their needs. All sites are coded to client specifications using HTML, CSS and PHP.

Our full suite of web services includes:

- Search engine optimization
- Website maintenance
- Website hosting
- Graphic development
- Web advertisement creation

Your Professional
IT Department

Your Professional IT Department

Noratek Solutions provides a broad portfolio of IT services that will allow you to concentrate on your core business. Our team of highly-qualified professionals provide exceptional IT needs analysis, managed services, server expertise, security and recovery solutions, and more. Noratek experts hold certifications from IT industry leaders including Microsoft, Oracle, CompTIA (A+ and Network+), and Red Hat (Linux).

You can rest assured knowing that your critical business applications are in our hands.

IT Needs Analysis

Noratek will work closely with you as your trusted IT partner. Based on your goals, our team of experts will conduct an in-depth analysis of your current system. Once the discovery phase is complete we'll provide a detailed review of our findings and recommend a roadmap to enhance the health and strength of your IT infrastructure.

Managed Services

Noratek's Network Reporter monitors the IT network and infrastructure of our Managed Services clients remotely. This valuable tool alerts our technicians to problems when they occur and enables them to provide a solution before you're even aware an issue exists. This proactive approach to IT network maintenance will reduce or eliminate downtime for your business - saving both time and money.

Server Expertise

Our technicians all possess a solid understanding of core technologies and have access to a variety of informational resources. This makes our technicians able to resolve any network or server issues as quickly as possible, to get your business back up and running, should downtime occur.

Network, Internet and Security Solutions

Network, Internet and Security-related services are a vital part of today's business operations. Noratek can customize your IT system to maximize security while increasing your access to information.

Computer Sales and Services

As your trusted IT partner, Noratek will determine your hardware and software needs and provide customized solutions to ensure they are met.

We know your time is valuable. In the majority of cases, issues will be resolved onsite. If this isn't possible, we'll transfer the equipment to a Noratek facility for analysis, perform the necessary repairs and bring it back on line for you quickly and efficiently.

Noratek Service Solutions:

- IT Needs Analysis
